

The mystery and magic of reverine marshes and swamps, their solitude and wildness, as well as their ecological significance, are depicted in a new book, *Changing Tides: Tivoli Bays, A Hudson River Wetland* by award-winning Rhinebeck photographer and writer Esther Kiviat. The book is a month-by-month natural history of the Tivoli Bays, protected fresh-water tidal coves on the east shore of the Hudson River National Estuarine Research Reserve. Illustrated with more 150 of the authors black-and-white and full-color photographs, and drawings by Kathleen A. Schmidt, *Changing Tides* provides fascinating glimpses of the prolific wildlife and vegetation of the Bays and adjacent uplands in both words and pictures. *Changing Tides* is based on Esther Kiviat's observations and experiences in the bays over the past ten years, supplemented by research and walks and talks with biologists and others.
