

Climate Change in Asia and the Pacific: How Can Countries Adapt compiles policies and best practices on climate change adaptation, emphasizing the fact that the Asia and Pacific region needs immediate measures both structural and nonstructural in order to adapt to climate change. The discussions elaborate on issues related to water resources, agriculture, and natural resources management, which are some of the most vital sectors for the region from environmental, social, and economic perspectives. Although the policies and measures discussed in the book are specific to the Asia and Pacific region, the key findings will be relevant to other regions as well; for example, Africa and Latin America.

Hell With the Fire Out: A History of the Modoc War, Chinese Medicine, For Englands Sake, Verses and Songs in Time of War, Hitori: The Hot New Japanese Numbers Game, The Symolism of Colour,
