

The untold story of an eccentric, scientific visionary whose death-defying research has saved millions of lives. Sixty years ago, cars and airplanes were still deathtraps waiting to happen. Today, both are safer than ever, thanks in part to one pioneering air force doctor's research on seatbelts and ejection seats. The exploits of John Paul Stapp (1910-1999) come to thrilling life in this biography of a Renaissance man who was once blasted faster than a .45 caliber bullet across the desert in his Sonic Wind rocket sled, only to be slammed to a stop in barely a second. The experiment put him on the cover of Time magazine and allowed his swashbuckling team to gather the data needed to revolutionize automobile and aircraft design. But Stapp didn't stop there. From the legendary high-altitude balloon tests that ensued to the ferocious battles for car safety legislation, Craig Ryan's book is as much a history of America's transition into the Jet Age as it is a biography of the man who got us there safely. 8 pages of illustrations

Anecdotes of painters, engravers, sculptors and architects, and curiosities of art Volume 2, Clocks, Spots and Dragons Audio CD (Cambridge Storybooks), Word Becoming Flesh, The Lady and the Duke: The Imperial Regency Series, Jottings on the History of the Narberth area and the Parishes, Enigmatic Evolution: Prose of Heart & Soul, Tom Swift and His Motor Boat - Primary Source Edition, Adluciner Chronicles: Robert,
