11 Jun - 5 min - Uploaded by MrWadeSecondGrade Life Cycles: A Bird Story. MrWadeSecondGrade. Loading. Baby hummingbirds life cycle. Starting the Cycle Over. Birds that are fully feathered and fly from the nest are now mature birds. These birds are ready to find mates and build nests of their own so they can lay eggs and become parents themselves, thus starting the bird life cycle all over. Birds are born inside hard-shelled eggs. For many days to weeks they are protected and kept warm by their parent(s). This is called incubation. After they hatch, they will be fed by their parent(s). Most animals including fish, mammals, reptiles and birds have very simple life cycles: they are born (either alive from their.
