

This book has been developed for a one-semester course usually attended by students in statistics, economics, business, engineering, and quantitative social sciences. A unique feature of this edition is its integration with the R computing environment. Basic applied statistics is assumed through multiple regression. Calculus is assumed only to the extent of minimizing sums of squares but a calculus-based introduction to statistics is necessary for a thorough understanding of some of the theory. Actual time series data drawn from various disciplines are used throughout the book to illustrate the methodology.

Workbench Projects: Hooded Merganser Drake (Wildfowl Carving Magazine Workbench Projects), Privateers and Privateering, National Geographic Magazine, June 1940 (Vol. 77, No. 6), SUSSEX ARCHAEOLOGICAL COLLECTIONS, RELATING TO THE HISTORY AND ANTIQUITIES OF THE COUNTY: VOL. XIV., Healing During Loss: The Rainbows of Memories Method, A Complete Guide to Learning the Irish Fiddle,
