

This volume was published in 1884. Excerpts from some of the subjects: **FRIENDSHIP:** Whether the observation of Cicero that friendship improves happiness and abates misery be universally true, is not beyond dispute. Friendship, which has been elegantly said to double our joys and divide our griefs, might also be declared not unfrequently to double our griefs and divide our joys. A very little reflection will show that this quality, which has been so often held up for admiration in the neatest of dresses, may also appear under a totally different garb. **CAPTIVITY:** Cervantes knew from experience the ills of imprisonment. He has painted them with exactest delineation and in liveliest colours, not only in one of the episodes of his master-work, but also in two theatrical pieces, describing the sufferings of Christian prisoners in a Mohammedan gaol. While serving as a soldier in the army of Philip II. he fell into the power of one of the most cruel tyrants of Algiers. His captivity, which lasted five years, caused him doubtless much corporeal suffering, but it never dimmed the lustre of his genius, abated the vivacity of his intellect, or chilled the fervour of his imagination. **CHIVALRY:** The ideal spirit of chivalry was indeed a spirit of all that is great and noble. To protect the unprotected, to assist the poor, to succour the widow and the orphan, to right all wrongs and to redress all grievances such was the high ambition of that sweet dream of the days of old. It was a holy institution, which bound its professors by a solemn consecration and by many vows of strictest observance. **SORCERY:** It is sad to reflect that on the rare occasions on which supernatural power has been given to mortals, they have seldom used it for other than evil purposes. The charmed cup of Circe turned men into grovelling swine, Canidia interfered with the course of the moon and the repose of the buried dead. Many volumes have been filled with the bad behaviours of sorcerers of modern times. King James, that wisest of kings, as he was called by Sir Francis Bacon, the wisest of subjects, wrote a book expressly to expose their wicked tricks.
