

The decision to develop and publish Vegetable Oils and Agrichemicals was made because of the need for a review and summary of the scientific and applied information on vegetable oil-agrichemical spray technology that is scattered among various scientific and popular publications. The information compiled in this book will: (a) benefit cotton producers through more efficacious, lower cost and safer pesticide applications; (b) benefit producers and cottonseed crushers through enhanced markets for cottonseed oil; and (c) help federal and state pesticide agencies make reasonable regulatory decisions regarding on-farm use of this technology.
